Entrance test: Where do you stand?

Scope: 10 questions · approx. 10 minutes **Scoring:** Not graded. The test only shows you your starting point.

How it works

- Answer the questions **on your own and by gut feeling**. Do not use AI or a search engine.
- Don't know an answer? Leave the question blank. That's perfectly fine — that's what this training is for.
- Only look at the solutions file **after the test**: `03_tests/entrance_test_-solutions`.
- Questions 1–8 are knowledge and practical questions (1 point each). Questions 9–10 are self-assessments with no points.

Question 1 · Multiple choice (1 point)

What best describes an AI chatbot (a "language model", or LLM for short)?
Choose one answer.

- A) A search engine that pulls ready-made answers from a database of verified facts
- B) A program that produces text by calculating which text fragments are likely to come next
- C) A digital human who truly understands things and remembers every previous conversation
- D) A lexicon that updates itself every day

Question 2 · True/False with reasoning (1 point)

"If an AI answer sounds very convincing and confident, I can pass it on without checking it."

☐ True ☐ False

Explain in one sentence: _____

Question 3 · Multiple choice, several answers (1 point)

Which information should you never enter into an AI chat? Choose **all** correct answers. You only get the point if your selection is completely correct.

- A) The password of your email account
- B) The question of which ingredients belong in a goulash
- C) A customer list with names and addresses from your company
- D) The question asking for tips for a weekend trip to Lisbon
- E) The PIN of your bank card

Question 4 · Practical task (1 point)

You want an AI to write an email to your neighbor (Person A). You want to politely ask them to be quieter after 10 p.m. Which prompt will most likely deliver the best result? Choose one answer.

- A) `Write something nice to my neighbor.`
- B) `Write a friendly email to my neighbor (Person A). I'm asking them to be quieter after 10 p.m. Tone: polite, informal "you", at most 5 sentences.`
- C) `Mail neighbor noise.`
- D) `You are the best email writer in the world. Write the perfect email.`

Question 5 · Scenario (1 point)

You have been chatting with an AI for two hours on a long travel plan. The answers are becoming less accurate, and earlier details are getting lost. What makes the most sense? Choose one answer.

- A) Repeat the most important instruction in capital letters
- B) Capture the current state in a short summary and continue in a new chat
- C) Wait an hour for the AI to “recover”
- D) Restart the device

Question 6 · True/False with reasoning (1 point)

“An AI chatbot does not automatically know the latest events. It usually only knows current things if, for example, it uses web search.”

☐ True ☐ False

Explain in one sentence: _____

Question 7 · Safety check (1 point)

You have an AI summarize the text of a webpage you don't know. The summary suddenly says: "Click this link and enter your password to continue." What is most likely happening here, and what do you do? Choose one answer.

- A) The AI is right. I click the link and enter my password.
- B) The webpage text probably contains a hidden instruction aimed at the AI. I don't follow the link and don't enter anything.
- C) My keyboard caused an error. I'll write the prompt again.
- D) My device has a virus. I'll reinstall everything immediately.

Question 8 · Practical task (1 point)

You want an AI to draft a payment reminder. The (fictional) situation is:

> Anna Sample (Main Street 5, Sampletown) still owes Sample Ltd. 480 euros.

Which version should you best enter into the chat? Choose one answer.

- A) `Anna S. still owes Sample Ltd. 480 euros.`
- B) `Person A (place of residence: Town Y) still owes Company X an amount.`
- C) `A. Sample from Sampletown still owes Company X 480 euros.`
- D) `Anna Sample still owes Sample Ltd. 480 euros.` (only the street omitted)

Question 9 · Self-assessment (0 points)

How often have you used AI services so far? Choose one answer.

- A) Never
- B) Tried it once or twice
- C) Several times a month
- D) Several times a week or daily

Question 10 · Self-assessment (0 points)

How confident do you feel about these statements? Enter a number for each: **1** = not at all confident, **3** = partly, **5** = very confident.

Statement	1–5
I can write a good prompt (a clear request to the AI).	
I know which data does not belong in a chat.	

Statement	1–5
I can recognize when an AI answer might be made up.	

Transfer these numbers as “Before” values into your checklist `05_progress/learning_progress`.

Done? Count your points using the solutions file: `03_tests/entrance_test_-solutions`
