# Test B – Good results (topics 05–11)

**Scope:** 20 questions · **Points:** 28 · **Pass mark 75 %:** 21 points

## How the test works

- The test shows you what has stuck and what you should review. It is not a certificate.
- Work without the cheatsheets. That way you see what you have really retained.
- Write down your answers (on paper or in a note file) before looking at the solutions.
- The solutions are separate: `03_tests/test_B_good_results_solutions`. Only look at them once you're done.
- You grade practical tasks and safety checks yourself using the self-assessment rubric (`self_assessment`) – criterion by criterion.
- **Note for the Standard path:** Questions 14–15 cover topic 09 (temperature & sampling), which belongs to the Advanced path. If you are taking the Standard path, skip questions 14–15: In that case, you count out of 26 points and pass with 20.
- No time limit. All examples contain only fictional data.

---

## Topic 05 – Prompt basics

**Question 1 · Multiple choice · 1 point** You want an AI to write an invitation to a barbecue evening. Which prompt will most likely deliver the best result? - A) `Write an invitation.` - B) `Write an invitation to a barbecue evening on Saturday at 6 p.m. in my garden. Target audience: friends and neighbors. Tone: casual, informal "you". Length: at most 6 sentences. Please ask for RSVP by Wednesday.` - C) `You are the world's best invitation writer. Write something great.` - D) `Invitation barbecue garden people.`

**Question 2 · Practical task · 2 points** Your prompt is: `Make me a study plan.` Rewrite it so that it - (a) states goal and context concretely and (1 point) - (b) specifies format and at least one constraint. (1 point)

**Question 3 · True/False with reasoning · 1 point** "The best way is to pack five different tasks into one single long prompt; then the AI works most thoroughly." True

or false? Explain in one sentence.

---

## Topic 06 – Prompt techniques

**Question 4 · Multiple choice · 1 point** What does “few-shot” mean in prompting? - A) You include one to three examples of the desired style or format. - B) You ask the AI only a few questions per day. - C) You limit the answer to a few words. - D) You switch off features of the service.

**Question 5 · Multiple choice (several correct) · 2 points** Which statements about prompt techniques are correct? Choose all correct answers. - A) Separators like `### Text` help to separate your own text from the instructions. - B) A role like “You are the world’s best expert” makes the answer reliably correct. - C) You can ask the AI to critically review its own answer, e.g., “Find 3 weaknesses in your answer.” - D) A positive instruction (“Write in short sentences”) usually works better than only a prohibition (“Don’t write long”). - E) Including examples never helps.

*(2 points for a completely correct selection, 1 point for exactly one mistake, otherwise 0.)*

**Question 6 · Practical task · 2 points** Your prompt is: `Write a product description for homemade jam.` Extend it with - (a) an example of the desired style (few-shot) and (1 point) - (b) a format specification. (1 point)

**Question 7 · Scenario · 1 point** The AI’s result is too long and too formal. What makes the most sense? - A) You start a new chat and enter the same prompt again. - B) You repeat the prompt in capital letters. - C) You give concrete feedback (“shorter, more casual, at most 3 sentences”) and let it revise. - D) You wait until the AI improves the answer on its own.

---

## Topic 07 – Prior knowledge & context

**Question 8 · Multiple choice · 1 point** You paste in a text and want the AI to answer questions based only on that text, making up as little as possible. Which instruction helps? - A) `Answer creatively and fill in missing information.` - B) `Answer as briefly as possible.` - C) `You are an expert, you know this anyway.` - D) `Answer only based on the following text. If it is not stated there, say so.`

**Question 9 · True/False with reasoning · 1 point** “It is better to paste in as context only the text that is relevant to the question, rather than everything I have on the topic.” True or false? Explain in one sentence.

**Question 10 · Multiple choice (several correct) · 2 points** What is true about persistent aids such as custom instructions, projects or memory? Choose all correct answers. - A) They can spare you from retyping recurring details every time. - B) Whatever is stored there is automatically safe. You don’t need to check privacy settings. - C) Passwords or sensitive data don’t belong there either. - D) All services offer exactly the same features under the same names. - E) Stored details can influence how the AI answers. You should check them occasionally.

*(2 points for a completely correct selection, 1 point for exactly one mistake, otherwise 0.)*

---

## Topic 08 – Hallucinations & fact-checking

**Question 11 · Scenario · 1 point** The AI names three studies with title, author and year for your presentation. Links are missing. What do you do? - A) I use them, because the details are that precise. - B) I ask "Are you sure?" and use them if the AI says yes. - C) I look up each source myself and check whether it exists and contains the claim. - D) I only check the years.

**Question 12 · True/False with reasoning · 1 point** "If web search is turned on, the AI can no longer make incorrect claims." True or false? Explain in one sentence.

**Question 13 · Safety check · 2 points** Find the warning signs in this AI answer (all details fictional):

```
According to Section 12 of the Sample Act, the deadline is exactly
14 days. This is confirmed by a study from the University of
Sampletown from 2019 (Prof. A. Sample, page 47). You can rely on it.
```

(a) Name at least two warning signs. (1 point)
(b) Name one concrete counter-measure. (1 point)

---

## Topic 09 – Temperature & sampling

**Question 14 · Practical task · 2 points** Assign: Is **low** (L) or **higher** (H) temperature a better fit? 1. Transfer prices and data from an email into a table 2. Collect ten original names for a café 3. Summarize a text factually, without adding anything 4. Develop various ideas for a birthday surprise

*(4 correct assignments = 2 points, 3 correct = 1 point, otherwise 0.)*

**Question 15 · True/False with reasoning · 1 point** "The same question can deliver different answers even at low temperature." True or false? Explain in one sentence.

---

## Topic 10 – Reasoning effort

**Question 16 · Practical task · 2 points** Assign: Is the **standard mode** (S) enough, or is the **thinking mode** (D) more sensible? 1. Translate a sentence into English 2. Phrase an email more politely 3. Plan a weekly schedule with fixed appointments, travel times and breaks so that everything fits 4. Solve a logic puzzle with multiple conditions

*(4 correct assignments = 2 points, 3 correct = 1 point, otherwise 0.)*

**Question 17 · True/False with reasoning · 1 point** "If the model shows its reasoning steps, the answer is guaranteed to be correct." True or false? Explain in one sentence.

**Question 18 · Scenario · 1 point** Your usage limit is already used up by midday. You had thinking mode turned on for every message, even for trivial things. What do you change? - A) I keep thinking mode on and pack several questions into one prompt. - B) I use thinking mode only for tricky tasks and handle routine in standard mode. - C) I write the prompts in capital letters. - D) I stop using the chat.

---

## Topic 11 – AI tools (tool use)

**Question 19 · Multiple choice · 1 point** What describes “tool use” best? - A) The model decides to call a tool (e.g., web search or calculator) and uses the result in its answer. - B) You install a program so the AI answers faster. - C) The AI permanently gets more tokens. - D) The tool is a password for the AI service.

**Question 20 · Safety check · 2 points** You give an AI access to your inbox, your calendar and all your files so it can organize appointments. (a) How do you limit the accesses? (1 point) (b) What do you define for actions with consequences? (1 point)

---

## Scoring

Count your points using the solutions file. - **21–28 points:** passed - **0–20 points:** not passed yet. The solutions show you which topics you should review. After that, you can retake the test.
