Test F Solutions – Final (Topics 22–24)

Pass mark 75 %: 13 of 17 points Only look here once you have finished the test. You assess practical tasks with the self-assessment rubric (`self_assessment`).

Topic 22 – Legal & Compliance

Cheatsheet: `01_cheatsheets/22_legal_compliance`

Question 1 – B (1 P): Name, date of birth and address clearly identify a person. A, C and D are anonymous statistics or conditions.

Question 2 – False (1 P): Responsibility stays with the human who uses and sends the output. “The AI wrote it” doesn’t let anyone off the hook.

Question 3 – Model answer (2 P): (a) 1 P for at least three pieces of information, e.g. name, address, phone number, invoice number (identifying in context), health information (knee surgery) – especially sensitive. (b) 1 P, e.g.:

```
From: Person A
Dear Team, I received a defective coffee machine on 5 March
(invoice 2026-4471). Please reply promptly.
```

Removed: name, address, phone number, health information. Kept: date, invoice number, core message – the analysis remains possible. (Alternatively, also shorten the invoice number if the analysis doesn’t need it.)

Question 4 – B (1 P): The organization’s rules (the club) apply in addition to platform requirements; if in doubt, label it. A conceals it, C is inadmissible, D is excessive.

Question 5 – False (1 P): Exams are governed by the rules of the institution (school, university, employer) – they can be stricter than the service’s terms of service. Both apply side by side.

Topic 23 – Everyday Workflows & Prompt Library

Cheatsheet: `01_cheatsheets/23_everyday_workflows`

Question 6 – A (1 P): Title, purpose, prompt, anonymized sample result (plus, if applicable, a note on model/mode). B is too thin, C violates the data rule (topics 04, 22), D has no place in a note file.

Question 7 – Model answer (2 P):

```
Title: Executive Summary
Purpose: Turn long texts quickly into what matters for decisions.
Prompt: Summarize the following text in five bullet points.
Target audience: executive without specialist knowledge. Format:
maximum 5 bullet points, each at most 2 lines. No introduction,
no evaluation. If a key piece of information is missing, mark
it with [OPEN].
### Text
[Text]
Sample result: 5 bullet points from a made-up project report.
```

- Purpose (1 P): describes the recurring problem the prompt solves.
- Prompt (1 P): names the target audience and format specification; bonus (no points): limits such as “no evaluation” or the [OPEN] marker.

Question 8 – B (1 P): A library is a living document: rework, test, update the entry. Deleting (A) wastes work, filler words (C) usually make things worse, switching services (D) doesn’t solve a prompt problem.

Topic 24 – Glossary & Further Learning

Cheatsheet: `01_cheatsheets/24_glossary_further_learning`

Question 9 – Model answer (2 P): (a) 1 P, e.g.: “A hallucination is an invented but convincing-sounding AI answer – for example made-up sources, numbers or quotes.” (b) 1 P, e.g.: “Human-in-the-loop means: the human approves actions with consequences (sending, deleting, paying) before they are executed.” Point allocation: correct core, understandable language, one sentence.

Question 10 – A, B, C, D (2 P): Benefit, risk, costs and data privacy are the check questions of the new-feature check (plus undo). Social hype (E) is precisely not a quality criterion.

Question 11 – B (1 P): Official documentation and help pages are the most reliable source for features, limits and prices – they change often. Social media (A) and old forums (D) are outdated or promotional, and the AI itself (C) doesn’t reliably know its current limits.

Question 12 – False (1 P): Test new features first with made-up data – if in doubt, in a test environment. Using real data immediately is exactly the risk the safety rules (topics 04, 21) are meant to avoid.

Adding up your points

Topic	Questions	Possible points	My points
22 Legal & Compliance	1–5	6	
23 Everyday Workflows & Prompt Library	6–8	4	
24 Glossary & Further Learning	9–12	7	

Topic	Questions	Possible points	My points
Total		**17**	

Passed: 13 points or more.

Review if you made mistakes

- **Mistakes in questions 1–5:** Topic 22 *Legal & Compliance* and extra exercises 22
- **Mistakes in questions 6–8:** Topic 23 *Everyday Workflows & Prompt Library* and extra exercises 23
- **Mistakes in questions 9–12:** Topic 24 *Glossary & Further Learning*

Not passed? Review the topics with the most mistakes and take the test again afterwards. Afterwards, the **final test** is open to you.
