Final test (all blocks)

Length: 30 questions · **Points:** 46 · **Pass mark 75 %:** 35 points **Structure:** approx. 60 % knowledge (recognizing, explaining) · approx. 40 % practice (applying, judging)

How this test works

- The final test covers the whole training – blocks A to F. It is the last step of the Advanced path.
- Work without the cheatsheets. Write down your answers (on paper or in a note file) before looking at the solutions.
- The solutions are in a separate file: `03_tests/final_test_solutions`. Only look at it when you are done.
- You assess practical tasks and safety checks with the self-assessment rubric (`self_assessment`) – criterion by criterion.
- No time limit. All examples contain only made-up data. This test does not replace legal advice.
- Not passed? The solutions show you the topics to review; afterwards you can take the test again.

Block A – Foundation

Question 1 · Multiple choice · 1 point Which statement about LLMs is correct? - A) They store your chats as permanent knowledge about you. - B) They predict text; their knowledge has a knowledge cutoff and can contain false “facts”. - C) They check every statement for truth before answering. - D) They are more reliable than search engines for current events.

Question 2 · Scenario · 1 point Your long chat is getting forgetful. What do you do? - A) Carry on – the AI will find its way around. - B) Have the history summarized in 10 lines and continue in a new chat. - C) Write all details in capital letters. - D) Ask the chat for an apology.

Question 3 · Multiple choice · 1 point You want a tricky, important result. Which rule of thumb fits? - A) A small model, to save your usage limit. - B) A larger (possibly thinking) model, because the task is worth it. - C) The model doesn’t matter, speed is what counts. - D) No model at all, only the context window matters.

Question 4 · Safety check · 2 points Which of these details do **not** belong in a chat? Name four and give a brief reason: (a) password · (b) made-up practice task with “Person A” · (c) API key · (d) a colleague’s health data · (e) a suggestion for a cake recipe · (f) customer data list

---

Block B – Good results

Question 5 · Practical task · 2 points Improve the vague prompt `Write something about our company party.` into a structured prompt with: goal/context, task, format, constraint, target audience. (Made-up data.)

Question 6 · Multiple choice (several correct) · 2 points Which techniques reliably improve results? Select all correct ones. - A) A concrete format specification (e.g. “table with 3 columns”) - B) 1–3 examples for style (few-shot) - C) A flattery role like “You are the world’s best expert” - D) Concrete feedback on an unsuitable result (iterating) - E) Positive instructions instead of pure prohibitions

(2 points for a fully correct selection, 1 point for exactly one mistake, otherwise 0.)

Question 7 · True/False with reasoning · 1 point “Answer only based on the following text. If it isn’t stated there, say so.” – This instruction reduces made-up content, but does not guarantee a correct answer.

Question 8 · Practical task · 2 points Assign: **lower** (L) or **higher** (H) temperature for … 1. Transferring prices from an email into a table 2. Collecting ten original names for a club 3. Solving a logic puzzle with several conditions (mode-dependent: standard/thinking) 4. Summarizing a text factually

---

Block C – Risks

Question 9 · Multiple choice · 1 point What is the core of **indirect** prompt injection? - A) Tricks in the chat that you type yourself - B) Hidden instructions in third-party content that the AI processes - C) Made-up facts from the AI - D) Chats that are too long

Question 10 · Scenario · 1 point Your calendar agent suddenly suggests confirming an appointment with an unknown link. What do you do? - A) Confirm it – the agent knows better. - B) Don’t confirm; check the suggestion, stop the agent if necessary, revoke accesses, report the incident. - C) Forward the link to friends. - D) Enter the appointment twice, just to be safe.

Question 11 · Practical task · 2 points Write two concrete, positive guardrail rules for an assistant that drafts texts for you: (a) against made-up details (1 point) (b) against legal or health advice (1 point)

Block D – Technology & Costs

Question 12 · Multiple choice · 1 point What is an API key? - A) A bonus code for discounts. - B) Your personal access key for the API – like a password with a credit card. - C) A model name. - D) A file attachment.

Question 13 · True/False with reasoning · 1 point “In the API context, a leaked key (someone else getting access to my key) can lead to unexpected costs – that’s why you revoke it immediately if you suspect anything.”

Question 14 · Practical task · 2 points Name three cost drivers when using AI and one saving measure for each.

Block E – Agentic Systems

Question 15 · Multiple choice · 1 point What distinguishes an agent from a chatbot? - A) The agent plans, uses tools and checks results – not just answering. - B) The agent knows more languages. - C) The agent is always cheaper. - D) The agent doesn't need any permissions.

Question 16 · Multiple choice · 1 point What best describes MCP? - A) A password manager. - B) An open standard that connects AI apps uniformly with programs and data. - C) An image generator. - D) A translation program.

Question 17 · True/False with reasoning · 1 point "I install foreign skills blindly as long as they are popular."

Question 18 · Practical task · 2 points A project (research, writing, checking) is to be distributed across subagents. (a) Name two advantages of splitting it up. (1 point) (b) Name one condition under which you would **not** split it up. (1 point)

Question 19 · Multiple choice · 1 point What does the **advisor** do in the advisor pattern? - A) It handles the routine work more cheaply. - B) It advises (stronger model) on tricky cases, but executes nothing itself. - C) It deletes error messages. - D) It replaces the human check.

Question 20 · Safety check · 2 points Your fictional file agent is allowed to: read and write all folders, delete, run without limit. Correct the configuration according to the five checklist points (rights, limits, permissions, backup, emergency stop).

Question 21 · True/False with reasoning · 1 point "When an agent is in use, the human always confirms actions with consequences (sending, deleting, paying, publishing)."

Block F – Final

Question 22 · Multiple choice · 1 point Which detail is **personal data**? - A) "120 visitors on Monday" - B) "Anna Sample, born 3 March 1985, 1 Example Street" - C) "Bread costs 3.20 on average" - D) "It is raining in Sampletown"

Question 23 · Scenario · 1 point You want to publish a club newsletter with AI-generated parts. What is the most sensible approach? - A) Keep quiet about the AI part. - B) Check the club's rules and, if in doubt, briefly indicate it ("created with AI support"). - C) Pass the text off as "100 % human-made". - D) Drop the newsletter.

Question 24 · Practical task · 2 points Complete a library entry for a workflow of your choice: title, purpose, prompt (with target audience and format specification), sample result (anonymized).

Question 25 · Practical task · 2 points Explain each of the following in one sentence for someone with no prior knowledge: (a) **Hallucination** (b) **Human-in-the-loop**

Question 26 · Multiple choice (several correct) · 2 points What belongs to the **new-feature check** for new AI features? Select all correct ones. - A) Benefit – does it solve a real problem? - B) Risk – what data and accesses does it expose? - C) Costs – what does it cost (money, limit, time)? - D) Data privacy – where do my inputs end up? - E) Hype – does everyone have it right now?

(2 points for a fully correct selection, 1 point for exactly one mistake, otherwise 0.)

Scoring

Count your points together with the solutions file. - **35–46 points:** passed - **0–34 points:** not yet passed. The solutions show you which blocks you should review. Afterwards you can take the test again. - Optional: confirmation of participation as a template (no formal certification).
